

GAS DETECTOR HEAD **GD-84D-EX SPECIFICATION**

Model	GD-84D-EX
Detection principle*	Electrochemical type, new ceramic type, semiconductor type, hot-wire semiconductor type
Detectable gas*	Toxic gases, combustible gases, oxygen
Indication	Full-dot display (Gas name display, flow display, mode display, communication status display, concentration display, concentration bar display)
Measuring range*	Refer to individual sensor specifications
Detection method	Pump suction method
Suction flow	Approx. 0.6 L/min
Alarm setpoints*	Refer to individual sensor specifications
Power indication	POWER LED lights up (green)
Indication accuracy*	Refer to individual sensor specifications
Response time*	Refer to individual sensor specifications
Alarm accuracy*	Refer to individual sensor specifications
Alarm delay time*	Refer to individual sensor specifications
Gas alarm type*	Two-stage alarm (L-LL, L-H, or H-HH)
Gas alarm indications	First alarm: ALM1 LED lights up (red) Second alarm: ALM2 LED lights up (red)
Gas alarm pattern*	Auto-reset or self-latching
Gas alarm contact*	No-voltage contact 1a or 1b Always de-energized (energized in alarm state) or always energized (de-energized in alarm state)
Fault alarm/ self-diagnosis	System abnormality, sensor abnormality, flow abnormality, fan disconnection abnormality, temperature increase abnormality, sensor life diagnosis
Fault alarm indications	FAULT LED lights up (yellow)/information displayed.
Fault alarm pattern*	Auto-reset or self-latching
Fault alarm contacts*	Overall fault contacts: no-voltage contact 1a or 1b Always de-energized (energized in alarm state) or always energized (de-energized in alarm state)
Contact capacity	24 V DC/0.5 A (resistance load)
Contact cable	CVV or equivalent cable (1.25 mm ² , maximum 18 core)
Transmission method	Analog transmission: two-wire analog transmission (4 - 20 mA DC, non-insulated, resistance load 300 Ω or less, including cable resistance)
Transmission cable	Analog transmission: CVVS or equivalent shielded cable (1.25 mm ² , maximum eight cores)
Functions	White backlight, alarm delay, suppression, zero follower, sensitivity correction, flow control, calibration history, alarm trend history, event history
Power cable	CVV or equivalent cable (1.25 mm ²), two-core
Power source	24 V DC ± 10 %
Power consumption	When 24 V DC is connected: approx. 8 W (maximum approx. 14 W)
Pipe connection openings	Rc1/4 (OD φ6-1 t half union for Teflon pipe <PP> supplied)
Initialization	Approx. 25 seconds
Operating temperature range	-10 - +40 °C (no sudden changes)
Operating humidity range	20 - 90 % RH (No condensation; may depend on the sensors installed.)
Construction	Wall mounting type
External dimensions	Approx. 150 (W) × 190 (H) × 146 (D) mm (excluding projections)
Weight	Approx. 1.9 kg
Exterior color	Main unit: Black Front door: White

* Please specify your request when ordering.

GAS DETECTOR HEAD
GD-84D-EX-EC SPECIFICATION

Model	GD-84D-EX-EC
Detection principle	Electrochemical type
Detectable gas*	Toxic gases, oxygen
Indication	Full-dot display (Gas name display, flow display, mode display, communication status display, concentration display, concentration bar display)
Measuring range*	Refer to individual sensor specifications
Detection method	Pump suction method
Suction flow	Approx. 0.6 L/min
Alarm setpoints*	Refer to individual sensor specifications
Power indication	POWER LED lights up (green)
Indication accuracy*	Refer to individual sensor specifications
Response time*	Refer to individual sensor specifications
Alarm accuracy*	Refer to individual sensor specifications
Alarm delay time*	Refer to individual sensor specifications
Gas alarm type*	Two-stage alarm (L-LL, L-H, or H-HH)
Gas alarm indications	First alarm: ALM1 LED lights up (red). Second alarm: ALM2 LED lights up (red).
Gas alarm pattern*	Auto-reset or self-latching
Gas alarm contact*	No-voltage contact 1a or 1b Always de-energized (energized in alarm state) or always energized (de-energized in alarm state)
Fault alarm/ self-diagnosis	System abnormality, sensor abnormality, flow abnormality, temperature increase abnormality, sensor life diagnosis
Fault alarm indications	FAULT LED lights up (yellow)/information displayed.
Fault alarm pattern*	Auto-reset or self-latching
Fault alarm contacts*	Overall fault contacts: no-voltage contact 1a or 1b Always de-energized (energized in alarm state) or always energized (de-energized in alarm state)
Contact capacity	24 V DC/0.5 A (resistance load)
Contact cable	CVV or equivalent cable (1.25 mm ² , maximum 18 core)
Transmission method	Analog transmission: two-wire analog transmission (4 - 20 mA DC, non-insulated, resistance load 300 Ω or less, including cable resistance)
Transmission cable	Analog transmission: CVVS or equivalent shielded cable (1.25 mm ² , maximum eight cores)
Functions	White backlight, alarm delay, suppression, zero follower, sensitivity correction, flow control, calibration history, alarm trend history, event history
Power cable	CVV or equivalent cable (1.25 mm ²), two-core
Power source	24 V DC ± 10 %
Power consumption	When 24 V DC is connected: approx. 2.5 W (maximum approx. 7 W)
Pipe connection openings	Rc1/4 (OD φ6-1 t half union for Teflon pipe <PP> supplied)
Initialization	Approx. 25 seconds
Operating temperature range	-10 - +40 °C (no sudden changes)
Operating humidity range	20 - 90 % RH (No condensation; may depend on the sensors installed.)
Construction	Wall mounting type
External dimensions	Approx. 150 (W) × 190 (H) × 146 (D) mm (excluding projections)
Weight	Approx. 1.9 kg

Gas alarm contact*	No-voltage contact 1a or 1b Always de-energized (energized in alarm state) or always energized (de-energized in alarm state)
Fault alarm/ self-diagnosis	System abnormality, sensor abnormality, flow abnormality, communication abnormality, fan disconnection abnormality, temperature increase abnormality, sensor life diagnosis
Fault alarm indications	FAULT LED lights up (yellow)/information displayed.
Fault alarm pattern*	Auto-reset or self-latching
Fault alarm contacts*	Overall fault contacts: no-voltage contact 1a or 1b Always de-energized (energized in alarm state) or always energized (de-energized in alarm state)
Contact capacity	24 V DC/0.5 A (resistance load)
Contact cable	CVV or equivalent cable (1.25 mm ² , maximum 18 core)
Transmission method	Digital transmission: Ethernet (10BASE-T/100BASE-TX) Analog transmission: two-wire analog transmission (4 - 20 mA DC, non-insulated, resistance load 300 Ω or less, including cable resistance)
Transmission cable	Digital transmission: CAT5e or better Ethernet cable Analog transmission: CVVS or equivalent shielded cable (1.25 mm ² , maximum eight cores)
Functions	White backlight, alarm delay, suppression, zero follower, sensitivity correction, flow control, calibration history, alarm trend history, event history
Power cable	CVV or equivalent cable (1.25 mm ²), two-core (Shared with digital transmission cable when PoE+ connection is used)
Power source	24 V DC ± 10 % or PoE+ connection
Power consumption	When 24 V DC is connected: approx. 9 W (maximum approx. 15 W) When PoE+ is connected: approx. 11 W (maximum approx. 16 W)
Pipe connection openings	Rc1/4 (OD φ6-1 t half union for Teflon pipe <PP> supplied)
Initialization	Approx. 25 seconds
Operating temperature range	-10 - +40 °C (no sudden changes)
Operating humidity range	20 - 90 % RH (No condensation; may depend on the sensors installed.)
Construction	Wall mounting type
External dimensions	Approx. 150 (W) × 190 (H) × 146 (D) mm (excluding projections)
Weight	Approx. 1.9 kg

Exterior color Main unit: Black Front door: White

* Please specify your request when ordering.

Outline Drawings

* RJ-45 connector for Ethernet cable connection is on the bottom of the main unit.
