

Among smallest and lightest in world; allows use without impeding work

Launch of GW-3 Portable Gas Monitor

Riken Keiki Co., Ltd. (Head office: Itabashi-ku, Tokyo) is pleased to announce the launch of its newly developed Portable gas monitor Model GW-3. The GW-3 will be available for purchase from October 4, 2019. The GW-3 is among the world's smallest and lightest. Its ultra-compact dimensions make it suitable for mounting on the wrist, arm, or a helmet. An ultra-light weight of approximately 45 g allows use without hindering work. A range of six different sensors are available to be mounted in the same case, making it ideal for use for a wide range of applications in all kinds of environments.

[New product features]

1. Among world's smallest and lightest

Offers functionality and performance equal to or better than previous models in a compact form weighing just 45 g.

2. Three-year sensor warranty

Reduced running costs by replacing sensors once every three years.

*One-year sensor warranty for galvanic cell type

3. Newly developed R sensor installed for improved performance

Incorporates R sensor with outstanding durability and performance allowing use over a wide range of temperatures.

First Japanese manufactured model to include CO & O₂ dual sensor

Single sensor simultaneously detects two different gases.

[Scheduled public announcement and launch]

October 4, 2019

[Scheduled shipping start date]

Except GW-3(CX)

: End of November 2019

GW-3(CX): End of December 2019
