Updated to offer broad lineup of seven models
Launch of 04 Series Portable Gas Monitors

Riken Keiki Co., Ltd. (Head office: Itabashi-ku, Tokyo) is pleased to announce the launch of its newly developed Portable gas monitors Model 04 Series. The 04 Series will be available for purchase from October 4, 2019.

The 04 Series is a successor to portable single gas monitors like the 03 Series and SC-01. It's available with an extensive lineup of seven different sensors, all sharing the same case. Compact dimensions and light weight allow use for a wide range of applications in all kinds of environments, without hampering work.

[New product features]

1. Broad lineup of seven models

Supports a wide range of applications in all kinds of environments.

*LEL/CO₂/NH₃/Cl₂/NO₂/PH₃ models are scheduled to be added to the lineup one after another.

2. Three-year sensor warranty

Reduced running costs by replacing sensors once every three years.

*One-year sensor warranty for galvanic cell type

3. Newly developed R sensor installed for improved performance

Incorporates R sensor with outstanding durability and performance allowing use over a wide range of temperatures.

First Japanese manufactured model to include CO & O₂ dual sensor

Single sensor simultaneously detects two different gases.

[Scheduled public announcement and launch]

October 4, 2019

[Scheduled shipping start date]

End of January 2020
